

RAHUL BANGLE

Associate Product Manager · AI & Agentic Systems

Hyderabad, India | 9346456928 | rahulbangle20@gmail.com | [linkedin.com/in/bangle-rahul-b33a71236](https://www.linkedin.com/in/bangle-rahul-b33a71236) | github.com/rahul-bangle

PROFESSIONAL SUMMARY

PM with 4+ years in EdTech & ops, now focused on AI-first and agentic product development. Shipped 3 AI-powered tools from 0→1 — including a multi-agent prompt engineering platform, a job automation system with LLM-based matching, and an agentic operations dashboard. Hands-on experience with LLM product decisions: model selection, token cost optimization, multi-model routing, and agent evaluation. NextLeap PM Fellow (Cohort 46). Targeting APM roles at AI-first or agentic-AI startups where I can own the product, not just document requirements.

PROFESSIONAL EXPERIENCE

Product Operations Associate — EdTech Insights

Aakash Educational Services Limited | Hyderabad

Feb 2024 – Mar 2026

- Structured 100+ parent/student interactions into requirement-style insights 3 themes directly adopted into ops improvement roadmap.
- Mapped lead-to-enrollment funnel; pinpointed 4 drop-off points → ops team acted on 2, driving a 20% CSAT improvement in Q3 2024.
- Pre-launch validation of onboarding flows flagged 6 usability gaps, 3 fixed before rollout, cutting post-launch escalations.
- Built feedback/SLA documentation system used by 2 teams for quarterly planning.

Team Leader — Sales Operations

Bright Career Guidance | Hyderabad

Nov 2022 – Jan 2024

- Led 12-member team to beat monthly conversion targets by 25% via sprint-style planning and weekly retros.
- Built KPI dashboards in Excel cut reporting time ~40%, enabling faster team decisions.
- Drove Salesforce/Zendesk adoption to 100% compliance in 6 weeks via SOPs + hands-on training.

Customer Experience & Operations Executive

Qconnect Business Solutions | Hyderabad

Jan 2021 – Jul 2022

- Analyzed 500+ tickets — top 5 issue themes led to redesign of 2 support workflows.
- Maintained 95%+ CSAT across phone, email, and chat — consistently top 3 in team.

PM PORTFOLIO — AI & AGENTIC SYSTEMS

Prompt Forge v4 | Multi-Agent Prompt Engineering Platform — 0→1

- Sole PM & builder defined product vision, wrote PRD, shipped in 4 weeks using agentic LLM pipeline with multi-model routing (Groq, OpenRouter).
- 3 usability rounds with 50+ users → restructured input flow, reduced time-to-first-useful-output from ~4 min → ~90 sec.
- Designed agent evaluation loop: tracked prompt completion rate, output acceptance rate, and session return rate across cohorts.
- Iterated model selection across 4 LLM configs based on token cost vs. output quality tradeoff analysis.

Mission Control Dashboard | Agentic Ops Monitoring System — React + Supabase

- Designed and built a real-time operations dashboard for monitoring multi-agent AI system performance — agent health, task queue, response latency.
- Defined product requirements: agent status visibility, alert thresholds, token spend tracking, and model fallback chain monitoring.
- Integrated Supabase Realtime for live updates; reduced manual system check time from 15 min → under 2 min per session.
- Used as internal tool to manage 5+ concurrent AI agents — iterated on UI based on daily personal usage feedback.

AI Eval Dashboard | LLM Output Evaluation Framework [IN PROGRESS]

- Building a lightweight dashboard to evaluate LLM agent outputs task completion rate, hallucination detection, response quality scoring.
- Implementing LLM-as-judge pattern: Claude evaluates agent responses against defined criteria, returns structured JSON scores.
- Goal: give PMs and devs a visual eval layer to ship AI agents with measurable quality thresholds, not just vibes.

Jobs Automator | *Job Search Automation — FastAPI + React*

- Scoped 3-feature MVP: resume parsing, JD-based LLM tailoring, job scraping. Shipped in 3 weeks.
- Iterated JD-to-resume matching accuracy 60% → 85% across 3 feedback cycles; reduced manual effort per application by ~70%.

Homework Helper | *Voice-First Learning PRD — Tier 2/3 India*

- Primary research with 15+ non-English-medium parents — surfaced voice as the primary accessibility need for homework help.
- Delivered full PRD: personas, JTBD, wireframes, D7 retention target, and phased rollout. Selected as cohort example by NextLeap mentor.

EDUCATION & TRAINING

NextLeap PM Fellowship 2026

PRD Writing · Agile/Scrum · User Research · Metrics · A/B Testing · Agentic AI Product Strategy · OKRs

B.Com (Computer Applications) Sri Medha V Degree College, Hyderabad · 2020 – 2023

TOOLS & SKILLS

Agentic AI	Multi-agent Systems, MCP (Model Context Protocol), LLM-as-Judge, Agent Evaluation, RAG Basics, Agentic Workflows, Token Cost Optimization, Model Routing
AI/LLM	Prompt Engineering, OpenRouter, Groq, LLM Product Thinking, Model Selection, Hallucination Detection, AI Workflow Automation
PM	PRD Writing, User Stories, OKRs, A/B Testing, RICE/MoSCoW, Roadmapping · Notion, Jira, Figma, Miro
Analytics	Excel, Google Sheets, SQL (basic) · Funnel Analysis, Cohort Analysis, KPI/OKR Tracking, Telemetry
Dev	FastAPI, React, Python, Supabase, REST APIs — enough to ship prototypes & have honest eng conversations
CRM/Ops	Salesforce, Zendesk, Freshdesk · SLA Management, Cross-functional Collaboration
